ELITE BLUE GROUP

With proven and successful track record in the maritime industry, Elite Blue Group operates various entities active across a wide range of products and services. As a customer-centric organization, Elite Blue Group focuses on customer satisfaction by bringing forward smart solutions tailored to meet customer's requirements and address their challenges.

The group has a team of experienced professionals who are committed to fostering innovative solutions and help customers overcome their challenges. Striving to provide quality services that exceed customer needs and expectations, Elite Blue Group has become one of the leading players in the maritime industry.

The conglomerate's assortment of companies and services includes:

- Seraland Services:** An exclusive SKF Marine Distributor with independent stock hubs.
- Sepac Marine Services:** An esteemed stockist of air compressor parts and reconditioned units, as well as a service & spare parts provider for steering gears and winches.
- Blue React SPD:** An optimization-oriented spare parts desk, where combination and blending of spare parts lead to a competitive purchasing solution.

WHO WE ARE

An exclusive SKF Marine Distributor with independent stock hubs.

Seraland Services is an exclusive Marine Distributor for SKF Bearings. Our goal is to provide fast-track service while reducing logistical costs.

BEARINGS

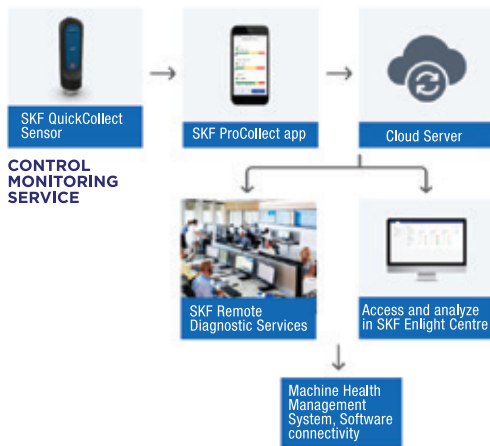

The benefit of having reliable guidance when considering equipment expenditures cannot be overstated. This is precisely where our role becomes significant. Seraland Services specializes in assisting ship owners in developing accurate budgets. Our approach involves large-scale supplies that align with the ships' yearly requirements and an agreed-upon price list. The goods are stored at our hubs without any warehousing costs, and are delivered upon request, whether it's quarterly, semi-annually, or annually.

Our hubs:

- Amsterdam
- Singapore

CONTROL MONITORING SERVICE FOR MOTORS

Monitoring vibrations in electric motors is essential as it enables you to promptly take maintenance actions and prevent potential damage. Our service gathers data from the motor through sensors, transmitting this information to a cloud database via a mobile application. Subsequently, the data is relayed to our onshore Enlight Centre, where comprehensive analysis and reporting are performed.

RECOND OIL BOX

Your oil does not age. It can be re-generated. Our Double Separation Technology (DST) changes the way you think about the oil: from a costly consumable to a full circular asset. DST helps the oil to become cleaner than even before and goes beyond conventional filtering. Recond Oil box can be used anywhere there is a heavy oil consumption.

RECOND OIL BOX

ALIGNMENT SERVICES

Onboard equipment shaft alignment is one of our specialties. Misalignments are caused by inadequate measurement technique or improper foundations. By aligning your machinery, you increase the lifetime of your bearings, seals, and couplings, reduce energy consumption, noise, vibration, and excessive wear.

ALIGNMENT SERVICES

Sepac Marine Services is a reliable stockist of air compressor parts and reconditioned units, as well as a service & spare parts provider for steering gears and winches. Our extensive experience, and technical know-how paired with our strong partnerships with major manufacturers, empower us to consistently meet the varying needs of the maritime industry. With our central stock hubs situated in La Spezia, Italy, and in Hamburg, Germany, we extend our reach to a diverse array of countries, covering regions such as Cyprus, Greece, Turkey, and the Middle East. This strategic positioning allows us to efficiently serve our customers, granting swift access to our comprehensive offerings.

WHO WE ARE

An esteemed stockist of air compressor parts, steering gears, and winches.

AIR COMPRESSORS

Sepac Marine Services upholds a comprehensive inventory of air compressor parts, encompassing both OEM and alternative parts. Our components undergo testing on compressor units to ensure optimal performance, adhering to stringent quality control systems. Our commitment to excellence is reflected in a six-month guarantee for wear and tear components, while main elements like liners, pistons, conrods, and cylinder heads/blocks are backed by a one-year warranty. Furthermore, Sepac Marine Services provides repair and reconditioning services for air compressor units, along with a variety of reconditioned units on hand.

Our stock range includes the following brands:

- Sperre
- Sauer & Sohn
- Hatlapa
- Hamworthy
- Tanabe

AIR COMPRESSOR MULTI SERVICE MAINTENANCE AGREEMENT

Our Multi Service Maintenance Agreement is a comprehensive solution, allowing you to either include all three products or any individual selection under a subscription scheme. This inclusive agreement covers a multitude of benefits, including free supply of spare parts, a single physical inspection at a convenient port, and several virtual inspections facilitated by our HoloLens glasses.

Fees are charged on a per-compressor, per-month basis, providing flexibility and tailored solutions for your needs.

DECK MACHINERY & WINCHES

Main components for winches are available in our stock in Germany. Repairs & services are performed by our team of experienced technicians for a variety of leading brands.

In particular, we offer spare parts and services, including but not limited to:

- Hatlapa
- KGW
- Pusnes
- TTS (drive and control)

STEERING GEARS

We hold essential components for steering gears in our stock in Germany. Our team of well-versed technicians performs repairs and services for a variety of leading brands.

In particular, we offer spare parts and services and not limited to:

- Hatlapa
- KGW
- Hydroster

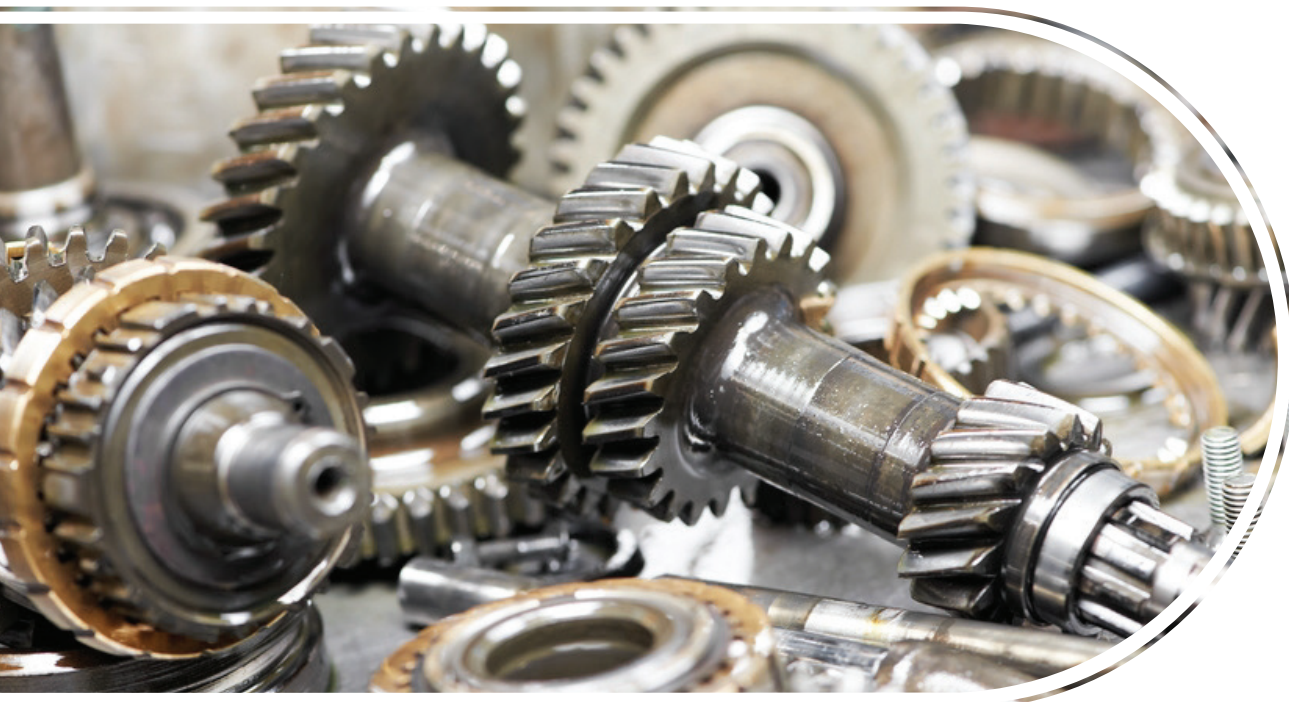

WHO WE ARE

An optimization spare parts desk.

Blue React serves as an optimization spare parts desk, where the combination and blending of spare parts result in efficient ordering processes and a competitive purchasing solution. Utilizing our extensive network of renowned suppliers and manufacturers, we provide competitive choices for OEM parts and/or high-quality equivalent components.

We optimize your order by carefully selecting, combining, and blending spare parts from a variety of providers, offering our customers certainty, trust, and peace of mind. Leveraging our network of prominent suppliers and manufacturers, we offer competitive options for OEM and/or premium-quality equivalent parts. At Blue React, our main objective is to deliver a comprehensive and simple service encompassing prompt quoting, competitive pricing, immediate availability, and quick dispatch facilitated by our in-house logistics partner. Furthermore, our forthcoming plans involve expanding our registry of dependable suppliers to ensure an ongoing provision of an alternative and cost-effective service.
